Subject

Burnt Willow Scoping Response

I had a phone call on 12.27/06 from James Johnston at FSEEE re: the scoping notice sent out for the BW >21" white fir change. He is happy that we want to remove them but questioned how the East Side Screens would apply. I told him that the East Side Screens amended the Fremont National Forest LRMP and that this proposal would allow for a site specific plan amendment, thus the East Side Screens would still apply to other forest lands not covered under this change. He asked if we had considered a forest wide amendment and I told him that would be addressed in the Forest Plan revision scheduled to start in the next couple of years. He requested a field visit before harvest occurs and after the project is completed and that if we have concerns expressed by any conservation organization he would like to discuss the project proposal with them (conservation organizations).
